EDUCATION

Texas A&M University—Kingsville

Master of Science in Computer Science

Relevant Coursework: Data Science, Database Systems, Data Mining, Cloud Computing, Artificial Intelligence

Aug 2024 – May 2026

GPA: 4.0/4.0

Savitribai Phule Pune University

Bachelor of Engineering in Information Technology

Aug 2016 – May 2019

GPA: 3.8/4.0

PROFESSIONAL SUMMARY

- Experienced Data Engineering professional with 4.5+ years designing, building, and optimizing large-scale data pipelines using Hadoop, Spark, Scala, PySpark, and Kafka to process high-volume structured and unstructured data.
- Skilled in managing diverse data formats including Parquet, Avro, ORC, JSON, XML, CSV, and modern lakehouse tables such as Apache Iceberg and Delta Lake.
- Proficient in SQL and query optimization across relational databases (PostgreSQL, Oracle, MS SQL Server, MySQL) and NoSQL systems (MongoDB), delivering actionable insights through Tableau, Power BI, and Excel.
- Hands-on experience with cloud-native solutions across AWS, Azure, GCP, and Snowflake, integrating scalable ETL workflows, automation, and cost-efficient architectures.
- Expert in Python and scripting with Pandas, NumPy, Matplotlib, Scikit-learn, and shell scripting, leveraging Git/GitHub, Docker, Jenkins, and CI/CD pipelines for automation and deployment.

TECHNICAL PROFICIENCIES

- **Programming & Scripting:** Python, SQL, Scala, Java, Shell Scripting
- **Data Engineering & Orchestration:** Apache Spark, PySpark, Kafka, Airflow, dbt, Hadoop
- **Cloud Platforms:** AWS (EC2, S3, EMR, Lambda, Glue, Redshift), Azure (Data Factory, Data Lake, Databricks, Synapse), GCP (BigQuery, Dataflow)
- **Databases & Warehouses:** Snowflake, PostgreSQL, MySQL, MS SQL Server, Oracle, MongoDB
- **Data Analysis & Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow
- **Data Visualization & Reporting:** Tableau, Power BI, Looker, QuickSight, Advanced Excel
- **DevOps & Other Tools:** Git/GitHub, Docker, Jenkins, OpenShift, Jira, Confluence
- **APIs & Integration:** REST APIs, Microservices

PROFESSIONAL EXPERIENCE

Texas A&M University—Kingsville | Graduate Assistant | Nov 2025 – Present

- Engineered and automated **Python** and **SQL** data pipelines to support faculty research and departmental analytics, cutting manual data preparation time by **35%**.
- Designed and deployed **Power BI dashboards** to visualize academic performance metrics, improving decision-making efficiency across **5+ departments**.

TruBridge | Data Analytics Extern | Jul 2025 – Sep 2025

- Conducted **end-to-end data analysis** of U.S. healthcare datasets; built ETL workflows in Python/SQL to merge datasets via FIPS codes, improving **data accuracy by 42%**.
- Developed **interactive dashboards** in Tableau, enabling stakeholders to visualize healthcare trends and social determinants of health and presented analytical insights to senior mentors, supporting **data-driven healthcare recommendations** and decision-making.

Texas A&M University—Kingsville | Graduate Assistant | Feb 2025 – May 2025

- Guided students in developing **Python-based projects simulating real-time data pipelines**, validating workflows to mirror industry practices.
- Designed and delivered **lab exercises on data cleaning, transformation, and visualization**, enhancing hands-on learning and technical proficiency.

NCS Technologies (NCS Group) | Data Engineer | Jun 2019 – Nov 2023

Client: Singtel, Singapore | Data Engineer (Jun 2021 – Nov 2023)

- Designed and deployed **cloud-based data products** in an Agile environment, improving data accessibility for 10+ business units.
- Ingested and processed real-time **Kafka streams into Elasticsearch**, creating clean Iceberg tables on AWS S3 used by customer-facing analytics dashboards.
- Developed and scheduled high-volume **Spark ETL jobs** that reduced data processing time by 36%.
- **Automated CI/CD pipelines** with Jenkins and Git, cutting release cycles **by 23%** and improving deployment reliability.
- Partnered with business stakeholders to translate requirements into scalable, **production-ready solutions** that improved reporting accuracy by 25%.

Client: Optus, Australia | Analytics Engineer (Jun 2019 – May 2021)

- Developed Spark pipelines for multiple **data formats (JSON, Parquet, Avro) transforming** terabytes of **raw data into structured datasets** for downstream use.
- Performed **complex data cleansing, validation, and aggregation** that improved reconciliation accuracy by 42%.
- Streamed **real-time Kafka** data into reconciliation applications, enabling near real-time **reporting**.
- **Collaborated with cross-functional teams** to ensure solutions aligned with enterprise architecture and compliance standards.

PROJECTS

• Retail Data Warehouse Pipeline

Designed and implemented a **SQL Server–based data warehouse** using Medallion Architecture (Bronze, Silver, Gold) to integrate ERP and CRM datasets. Built and optimized **ETL pipelines and star schema models**, reducing query latency by 30% and enabling scalable reporting for business teams. Delivered near real-time analytics, accelerating reporting turnaround by 35%.

• E- Commerce Data Lakehouse Pipeline

Developed an **Azure Data Lakehouse pipeline** with Data Factory, Databricks, and Delta Lake to automate ingestion, transformation, and curation of raw e-commerce data. Delivered **analytics-ready datasets and KPI dashboards in Power BI**, cutting time-to-insight for sales and marketing leaders by 40%.

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** Microsoft Azure DevOps Engineer Expert, Azure Developer Associate, Azure Fundamentals
- **Singtel Spot Award** – Recognized among the **top 2% team performers** for outstanding project delivery
- **NCS Spot Award** – Awarded for outstanding performance and contribution to project
- **KC Mahindra Education Trust Scholar** – Awarded for academic excellence and high potential in engineering studies
- Earned **100+ skill badges** on Percipio, demonstrating continuous learning in data and cloud technologies.
- **Best Badminton Player** – Winner of the Women’s Intercollegiate Tournament
